ALSO A GOOD TWO REEL COMEDY

CLARESHOLM LOCAL NEWS

Born, on July 31, to Mr. and Mrs. G. Ritten, a daughter.

Johnny McIntosh of the C.P.R. staff is off for two weeks' holiday.

L. C. Crane has taken over the Alberta Pacific elevator at Fairview.

Miss Jessie Elverum has returned from a holiday spent in Calgary.

You can save big money by getting your market and threshing orders Clack Bros.

A good soaking rain fell here on last Sunday night. It will be of great benefit to late grain.

The United Church Sunday school picnic was held at Sharpley grove on Wednesday this week.

Arnestad Bros. have a complete threshing outfit for sale at a bargain. See their ad. in another column.

Harvesters have been very much in evidence in town this week. Most of them appear to have secured work.

Afternoon Tea, served with free cup reading, Wednesday, 18th and Friday, 20th, from 3 till 5, at Mrs. Geo. Nelson's, First avenue south.

Raymond Griffith in "Wet Paint," with Helene Costello and Bryant Washburn, at the Rex theater on Friday and Saturday nights this week.

Miss Loevic, who has been visiting with her sister Mrs. Stanley Wyatt, left the first of the week for New York, where she will spend the winter.

Wednesday this week was the last of the fall holidays for this summer in Clareholm. From now on business places will be open on Wednesday afternoons.

Don Colman is now representing Hensman & Co. Ltd. and is handling their pianos and other musical instruments in this district, with headquarters in Calgary. We wish Don success in his new occupation.

Spring wheat cutting started last week on the demonstration farm here. Several farmers in various parts of the district also made a start last week. Cutting is now fairly general in this district.

A demonstration in millinery will be held under the auspices of the Clareholm U. F. W. club, September 15-20. Anyone wishing to join the class, would they kindly let Mrs. E. W. Fenton or Mrs. Salmon know as soon as possible.—Secretary.

Conservatives of the Macleod federal riding at their nominating convention held at Macleod on the 5th, chose John Herron of Pincher Creek as their standard bearer in the present federal contest. No other name was proposed. Mr. Herron represented Macleod riding at Ottawa for two terms, being defeated in 1911.

OBITUARY

The funeral of Paul Stanton Clack took place at the United Church on Wednesday afternoon at two o'clock, the Rev. Langille officiating, and the impressive rites of the Masonic Order and Knight Templars being observed.

The late Mr. Clarke passed away very suddenly on Sunday morning, August 8, and his sudden death came as a great shock to his many friends.

Mr. Clarke was a native of Mount Pleasant, Minnesota, and was fifty-two years of age. He came to Granum twenty-two years ago where he has resided ever since. Mr. Clarke has always been a prominent participant in church, social and municipal life and his place will be very hard to fill. He was a member of the Granum United Church and belonged to the Masonic Order, the Shriners and Odd Fellows.

Mr. Clarke is survived by his wife; daughters Mrs. Fred Patterson and Mrs. Percy Gainer of Craignyle; Ray of Los Angeles; and Marion and Pauline at home; also three sisters: Mrs. S. Crab of Lethbridge, Mrs. J. W. Morrow of Clareholm, and Miss

Margaret Clarke of Black Diamond, Washington; six brothers: Bert, Elmer and Jess of Granum; Glen, Harry and Thomas of St. Paul, Minn.

The many beautiful floral tributes, showed the great love, esteem and respect in which the deceased was held.

The pall-bearers were: J. B. Allison, W. Sherman, G. Goosen, D. Cunningham, J. Marsh and A. McMillan.

The remains were laid to rest in the Granum cemetery with the evergreen sprays of his brother Macdon.

ELKS' SPORTS DAY AND CARNIVAL BIG SUCCESS

The Clareholm Elks' first annual sports day and carnival was an outstanding success. A big crowd came to town to witness the parade at noon, which was easily the best ever put on here. The Elks in uniform, the Mount of Rides, the beautifully decorated cars, the meritorious floats, the calathumpian section, and all led by the Lethbridge Elks' Band, made a parade long to be remembered.

The afternoon racing program featured the usual events, but the members of the local lodge believe that in the Elks' Derby for which the Clareholm B. P. O. E. No. 124 presented a cup to be competed for annually, they have instituted the first Elks' Derby in Canada.

An interesting feature of the race was that the first winner is an Elk: Sandy Schnarr, of Macleod, with Slipivity. Blaroch Fox, owned by J. R. Watt, Clareholm, came second, with Twister, owned by Felix Moran, Nanton, third.

Miss Clara Edlund who had the honor of being the Derby Queen, presented Mr. Schnarr with the Elks' cup, and Pat Schnarr who rode Slipivity, with a very fine whip. Miss Edlund herself was the recipient of a gold bracelet and a beautiful bouquet.

The other races resulted as follows:

Pony race, half mile—1, Chino (F. Moran, Nanton); 2, Stately Lass, (Tom Clancy, of Stavelay); 3, Comet, (L. Oviatt, Stavelay).

Five-eighths mile—1, Chino; 2, Arctic Lady, (John Franklin, Macleod); 3, Dominion, (All Strangways, Clareholm).

Cowboy race—1, Brilliant, (D. Heyland, Clareholm); 2, Dominion, (All Strangways, Clareholm); 3, Brownie, (P. Burton, Clareholm).

The football game between Vulcan and Clareholm resulted in a victory for Vulcan, the score being 34.

The children's sports were contested keenly and were thoroughly enjoyed by the little folks.

The baseball game between Macleod and Clareholm was won by Macleod, the score being 14 to 11.

The baseball game between Stavelay and High River was won by Stavelay, the score being 15-1.

The evening carnival drew big crowds both evenings. The various booths were centers of attraction. Hot dogs, ice cream, Indian blankets, house-ice, and other booths drew large patronage. The sweet little pigs were irresistible.

The jitney dance was well patronized both evenings. The popular Mack's Melody Makers furnished the music on Friday evening, and the famous Kewpie orchestra from Stavelay tickled the feet till they just couldn't keep still on Saturday evening.

Parade prize winners were as follows:

For best decorated car—Mrs. Mark Fisher.

For best comic novelty—Tommy Evans.

Best decorated float—Clareholm Hospital.

Best Calathumpian—Stanley Wyatt and E. H. Mack.

Child's comic—J. Loun Anderson; 2, Reggie Walke.

The grand prize, the Orthophonic Victor, was drawn by Mrs. Gilbert Schumacher of Stavelay.

Millions are Lost Annually In The Western Provinces Through Lack of Research Work

The lamentably apathetic attitude of this country toward scientific research is frequently pointed out. Lack of necessary research and the consequent loss of money and time in the industry is a standing subject with the Canadian Manufacturers' Association; it was referred to again at the recent annual convention. Men who understand how wealth is being created and employment is being provided in other countries, and the handicap under which Canada is laboring by comparison, cry out for an awakening which does not come. We are to be sure creating little things that we fail to appreciate the large problems, a solution of which would wipe out many of the smaller difficulties, says the Toronto Globe.

It might amuse even the Canadian Manufacturers' Association to hear Dr. H. M. Tory state that such an organization as a department of science, industry and commerce "could in a few hours be made to do more for industry than all the petty tariff changes about which there is so much agitation." These words were used in an address which is published in the Toronto Board of Trade Journal. They emphasize what he regards as the vital importance of research work. It is quite natural that, as president of the Advisory Council on Scientific and Industrial Research, he should be partial to that organization, but his arguments are highly convincing.

We are lamenting the departure of many trained men from Canada. Many of them have been drafted by other countries spending millions of dollars annually on research work, while we spend not more than a quarter of a million. The field awaits them at home to their own profit and that of the country, but we do not realize it. There are scores of questions demanding solution, having to do with industry, agriculture, forestry and commerce, requiring the employment of specialists, and each of them offering a potential return to the country of many millions of dollars. Canada is losing in letting the intelligence and producing ability of these men go elsewhere, but is losing far more in failing to grasp the opportunities which would keep them here.

It is a typical case, as Dr. Tory points out, that more time and attention are given to the expenditure of money on the Hudson's Bay Company than on the elimination of wheat rust in the west, yet during the last eight years Manitoba and Saskatchewan have lost \$25,000,000 annually through this blight. And when an expert in pathological work was required, for study the subject the government was \$2,000. During the past four years the country has paid out \$2,000,000 for cattle slaughtered because of tuberculosis treatment, yet the country is not willing to pay for research to wipe out the malady.

The discovery of Marquis which has already been worth \$100,000,000 to Western Canada. The exportation of the fifteen from the far sands of Northern Alberta has been worth millions of dollars so far, and will eventually run into wealth which cannot at present be estimated. That there are only illustrative of what can be done in industry as well as with regard to natural resources. Research made Germany first and then the United States industrial leaders. Britain is now spending \$5,000,000 a year in learning the secrets which research work will disclose. The United States is spending much more to continue its development. But Canada is almost hopelessly uninterested.

We mourn about our taxes and our debt, and this is Dr. Tory's reply: "It is to you that if we would these" the mantle of parsimony and the inferiority complex which has possessed us, and risk the use of the brains and valuable intelligence of our people, in one generation we would add to the national assets of our common country the equivalent of our national debt."

Optimism, energy and determination to submerge minor things in a practical working out of the greater problems are all that Canada needs.

Tubercular Free Area
Saskatchewan's first tubercular free area is now being established on the east side of Last Mountain Lake where the testing of 26,600 cattle is at present under way. Six rural municipalities petitioned to have this work done and the proposed area was recommended to the federal authorities by the provincial minister of agriculture.

France established its metric system of measures in 1799.

W. N. C. 1678

Sweet Clover As A Green Manure

Shown to Greatly Increase the Yield

Comparing sweet clover with peas as green manure crops, the results were quite definitely in favor of sweet clover in experiments over several years conducted at the Brandon, Manitoba, experimental farm. The yield per acre of wheat following the ploughing under of sweet clover was higher than that after peas or after summer-fallow even when manured. Besides this, sweet clover can be ploughed under the oat crop the previous season at a very small cost, while the cost of seeding peas in a green manure is not small. Furthermore, the use of peas as a green manure crop requires two ploughings during the winter, whereas the ploughing under of sweet clover can be done at only the additional cost of seed over the ordinary winter fallow.

The experiments also show that the clover plots in which moisture is the prime requisite, sweet clover should be ploughed under when no higher than twelve inches. On the other hand, where moisture is not the prime requisite, the clover should be allowed to grow to 18 to 20 inches as the amount of nitrogen returned to the soil is in direct proportion to the height of the crop when ploughed.

Beet Sugar Industry

Area to Beets of About 7,000 Acres in Southern Alberta

The beet sugar industry in Southern Alberta is well along in the second season of its operations, with an area to beets of about 7,000 acres, with favorable conditions prevailing. Mr. A. S. Atkin, agricultural expert of the Canadian Sugar Company, parent of the Canadian Sugar Beet Company, Ltd., which has been operating the plant at Raymond, Alta., plant, stated after an inspection of beet lands that soil conditions were very favorable. While some growers may be obliged to irrigate their beet land, this practice is not likely to prove general.

The United Irrigation district, northwest of Cardston, will ship beets to the Raymond factory for the first time this year. The extension of a branch line of the Canadian Pacific Railway from Cardston into that fertile tract makes the growing of sugar beets feasible. This line, 29 miles in length, is now under construction, serving a fertile mixed farming area of some 25,000 acres. The block is occupied by Mormon farmers, who are experienced beet growers. The district will raise upwards of a thousand acres of beets this year.

Canada Ships More Wheat

Over Half of World's Wheat Exports Made By Canada in Period Under Review

Over one-third of the wheat exports of the principal wheat exporting countries of the world during the period from August 1, 1925, to February 28, 1926, was made by Canada. According to returns received by the bureau of statistics, wheat exports in the same period were valued at \$118,741,000 bushels and of this amount Canada shipped 59,512,000 bushels. In the same period last year exports of wheat from Canada amounted to only 58,516,700 bushels.

Ask For Government Subsidy

Beet Sugar Industry For B.C. Is Possible

The possibility of a beet sugar industry in British Columbia will be undertaken if the Provincial Government will subsidize the production of sugar at the rate of \$200 a ton. Mr. W. H. Watson, head of a Vancouver syndicate, informed the cabinet. The proposal was made to a factory at New Westminster to cost about \$125,000, and capable of handling one thousand tons of beets a day.

The subsidy asked of the government would amount to one-half cent a pound on all sugar produced up to ten million pounds.

U. S. Crops Below Average

Based on its forecast on conditions on July 1, the United States department of agriculture established the prospective harvest of important farm crops, declaring "The complete condition of all crops was 4.4 per cent below the average July condition during the last ten years." The forecast included: wheat, 2,660,000,000; corn, 5,647,000,000; spring wheat, 199,385,000; and oats, 1,324,260,000.

A rule may work both ways and still be a poor one.

Co-operative Livestock Marketing

Taking Necessary Steps to Form Organization in Manitoba

Following the inter-provincial conference on co-operative livestock marketing at Regina, held a short time ago, the United Farmers of Manitoba have taken steps to bring about the formation of a provincial organization for co-operative livestock marketing similar to those already established or under way in Alberta and Saskatchewan. At the meeting of the central board of the association on June 17, it was decided to call a meeting to be held in Winnipeg on August 5, of representatives of the U.F.M. locals which are co-operatively shipping and of organized shipping associations in Manitoba. This meeting will consider the question of getting co-operative livestock marketing in Manitoba on a contract basis. Several U.F.M. locals and associations have already either established or taken steps towards establishing the use of the contract in their own locals, and the idea of making use of the contract plan, gaining favor in Manitoba, has already been the case in the other provinces.

At the Regina conference it was arranged to establish an inter-provincial committee on co-operative livestock marketing, one representative to be appointed from each province. Mr. A. M. Poole, president of the United Farmers of Manitoba, has been appointed pro tem. to represent Manitoba on that committee. He will act until the meeting of shipping association representatives on August 5 is held, and that body will be asked to select the representative to act after that date.

Canada Seed Growers

To Enlarge Scope By Growing Certified Vegetable Seed

Plans have been made by the Canadian Seed Growers' to enlarge the scope of the association in the growing of certified vegetable seeds. The horticultural committee has placed severity varieties of vegetables upon the eligible list, and "elite stocks" of foundation seed will be distributed among the members of the association. The committee also plans to increase the number of the growers, from there they will be placed in the hands of the growers.

Hard On Golfers

Raspberry, curing and using "over-ripe" grapes in the streets and in public places, including golf courses, of Genoa, Italy, is made an offence under a new municipal ordinance. A fine from 25 to 50 lire may be levied for each conviction.

"John and Phyllis seem to be pretty tight, don't they?"
"Yes—both of them!"

Demand For Poultry

Active Market for Canadian and American Dressed Poultry in Britain

There has been an active demand in the Liverpool district for Canadian and American dressed poultry during the present importing season, which will soon be drawing to a close, writes Trade Commissioner Harry A. Scott, Liverpool, in the forthcoming issue of the Commercial Intelligence Journal. The anticipated supplies from Russia are not forthcoming, and shipments from France, Austria, and Hungary have been light. The season for imported poultry tends to begin later in the year. Although commitments were considered by imports as usual during the winter months, the actual marketing of American and Canadian poultry really commenced this year around the end of March, and it is anticipated that deliveries may continue well into July. By far the largest export of imports has come from the United States.

Cattle Shipments Abroad

Falling Off in Exports of Cattle To Great Britain

There has been a distinct falling off in cattle exports to the United Kingdom. A few weeks ago the total exports for 1925 stood at a figure nearly 10,000 greater than for the corresponding period of 1925. The total for 1925 is slightly less than 6,000 greater.

The explanation in part is that there have been outbreaks of foot and mouth disease in the United Kingdom and Scotland, which have impeded the movement of cattle.

The latest figures available are for the week ended July 1, 1926. The shipments for the week totalled 1,575 head, bringing the total for the year up to date to 49,310 head in comparison with 42,162 for the corresponding period of last year, and 35,429 in 1924.

Grain Shipped West

Record Grain Movement Through the Port of Vancouver

Grain exports through the port of Vancouver during the period from August 1, 1925, to June 30, 1926, approximated 20,000,000 of this year was shipped to the United Kingdom and 20,000,000 to the Orient. The movement so far this year is greater in volume than it has been for some time, and the final figures of the grain movement through this port for the 1925-26 season are expected to constitute a new record.

Every community has at least one no-account man who can always get somebody to sign his note.

Believes That Next Great War Will Be Fought In The Air And Will Be Decided Quickly

Control Cabbage Worm

The Most Destructive Insect Enemy Of Cabbage Crops

The common cabbage worm, the most destructive insect enemy of cabbage and related crops, is best controlled by spraying with lead arsenate or calcium arsenate. Early in the season the worm attacks the cabbage, ridging the outer leaves as they form, frequently feeding within the immature heads, which are rendered unfit for food. Sometimes it cuts the "lead" from the young plant, thus preventing development of the head.

Arsenic poisons may be applied to dust form rather than as a spray by mixing the powder with hydrated or alkali-free lime, sand, plaster, dusting or clearing, light sandy soil, or fine material which will adhere to the cabbage leaves. Although dusts are easily and quickly applied and the sprays, they do not always distribute the poison as evenly, and unless the dusting is done when the plants are wet, they do not stick as well.

Many Hollanders Coming

Dutch Farmers Are Attracted By Possibilities in Canada

Canada as the future home of Dutch farmers who desire to emigrate from their native land is now attracting a great deal of attention in the Netherlands according to J. A. A. Harland, who is settled in Canada for the purpose of taking a survey of conditions as they affect his people. Mr. Harland is managing director of the Central Emigration Foundation of Holland, an organization of semi-official standing which provides for the intelligent selection of the people and has come to Canada to see conditions for himself. In this connection he will visit as many communities as possible, and is likely to provide suitable locations for Dutch farmers, his itinerary including a comprehensive tour of territory along Canadian railways in Western Canada.

Dates Of Cutting Rusted Wheat

In Ordinary Seasons Early Cutting Found To Be Detrimental

The Brandon, Manitoba, experimental station has during the last three years carried on experiments to determine the effect of premature harvesting of rusted wheat on the yield, quality and plumpness of the grain. The experiments, which are described in the report of the superintendent, indicate that in ordinary seasons early cutting is distinctly detrimental, while during even severe rust epidemics, nothing is gained by cutting earlier than the prime dough stage. Ordinarily it is good practice to begin cutting before the grain is dead, in part on account of the large average under crop. This is particularly true when the wheat stem sawfly is prevalent and when the varieties of wheat grown are prone to shatter.

World's Record

Established By Cow

Four-Year-Old Jersey Bull in British Columbia Ties the Record
Pretoria Oxford Jansz, four-year-old Jersey cow, owned by Foster Whitlock, of Haisla Ranch near Armstrong, B.C., recently established under government test, a new world's record in her sales for milk and butterfat production.

Her record for 265 days was 15,925 pounds of milk and 572 pounds of butterfat. This Okanagan Valley cow has not only broken the world's record in the four-year-old class in which she was running the test, but she has also passed the record of a four-year-old Jersey cow in this particular and had topped the record for actual milk production in this breed.

Won Distinguished Service Cross

The homing pigeon's value as a messenger was recognized by military authorities during the World War. Much has been written of "Cher Ami," a homing pigeon, which with one leg carried the message that saved the lost battalion from annihilation and was afterwards awarded the distinguished service cross. Over 200,000 birds were used during the war. The "races" of the air has its commercial and military value, as well as its sportive attraction.

Sir Adolph Tuck Dead

Sir Adolph Tuck, who introduced the picture magazine into Great Britain, died in London recently.

Goodness isn't always admirable. Some men are good for the same reason that a snail never runs quick.

The London Spectator says there is

extreme uncertainty that there will be much room for latitude in future relations between Canada and Britain in the event of a war. It then Arthur Meighen went even further than it. Hon. Meighen said the Spectator continues, in demanding that the satisfaction of Canada's participation should come from a new parliament, especially elected for the purpose.

It is generally assumed that in a future war the first blow would be struck from the air, and possibly the first few hours would be almost decisive, the Spectator continues. Delay on the part of the Dominion in joining the war because parliament had to ratify the decision might be fatal.

"However, we know perfectly well that if Britain went to war in a just cause, which concerned the whole empire, it would be impossible to shut the Canadian people back. The Spectator says: "That certainly transcends all difficulties of form and method, and it is probable that the Canadian Government may be able to lay a clear case for discussion of these aspects of the question."

The Saturday Review says that the Canadian people are not in the least disinterested of the political life of Canada. No party has a policy which can keep pace with the demands of the continually changing conditions. The greatest need of Canada, according to the Review, is a policy which shall indicate a clear line of ambition, in the world and imperial affairs.

"For the present, and probably for some considerable time to come, Canada is likely to be evolved this way and that over minor issues which are administrative rather than political questions," the Review says.

Lawns For Farm Homes

Valuable Hint For Cultivating Lawns

On Prairie Farms
The growing of lawns on the prairies is particularly difficult because of the lack of sufficient moisture in most seasons. The lawns on the prairies have been tried out at the Dominion experimental station, at Rossburn, and the most satisfactory mixture of 15 pounds of Kentucky Blue Grass seed and one pound of White Dutch clover seed, sown at the rate of one pound to 500 square feet. Preparation for the lawn must begin the year before, and perhaps the most satisfactory method is to give it a heavy coating of manure and plant potatoes.

This enriches the soil, cleans it of weeds and leaves the soil in splendid physical condition. After such preparation the soil should be raked level as early as the ground can be worked, rake and level again, and sow the seed and rake it in the fall. It is better to sow the seed in the fall, as the seed will be more evenly distributed, and the seed will be more evenly distributed, and the seed will be more evenly distributed.

It is better to sow the seed in the fall, as the seed will be more evenly distributed, and the seed will be more evenly distributed, and the seed will be more evenly distributed.

Farmers Well Satisfied

Prospects of Large Yield and Good Prices For Wheat

In a recent statement on the crop outlook in Western Canada the "Nor' West Farmer" published in Winnipeg states that farmers in the three prairie provinces—Manitoba, Saskatchewan and Alberta—were well satisfied with the season. They see prospects of a profitable crop; they are satisfied that the post marketing of wheat means a higher price. Approximately seventy-five per cent of the wheat crop has been marketed by the Canadian Wheat Pool, the largest co-operative organization of its kind in the world. Its membership now totals 125,000 actual farmers in Manitoba, Saskatchewan and Alberta.

Gum Is Dental Necessity

Classification of chewing gum has been changed in the official customs list from "confectionery" to "dentifrice." Experts have agreed that the chewing gum is a dental necessity.

To Mix Gas and Alcohol

The United States Government is now going to put gasoline into its military aircraft. The government says that it will have a much harder time to make their way from it.

Mayor Martin of Montreal Goes West

His Honor Mayor Martin, Mayor of Montreal, with the Lady Mayors on his right, photographed in the Windsor Street station, Montreal, just prior to leaving on the across-Canada C.P.R. tour organized by the University of Montreal. About a hundred representative Quebec and Montreal citizens took the Mayor's trip to Victoria and back, and they included prominent university professors, doctors, lawyers and judges. The success of the initial trip lay well in its continuance again this year.

Clareholm Has Sweet Revenge

Before a fair-sized crowd here Wednesday evening the Clareholm boys took the Vulcan basketballers into camp to the tune of 34-20.

Clareholm excelled in short passing and ran rings around Vulcan. Play in the last period was very difficult owing to the darkness. As a result the home boys messed up many passes or the score might have been worse. The Vulcan boys played a good game but showed a tendency to be rough which did not please the crowd. Clareholm wins the round 52-50 as Vulcan won their home game by a score of 30-18.

The line-ups—
Vulcan Clareholm
Burkitt (6) Forward (16) Grace Stewart (6)
(3) Torfin
(2) Moffatt
Johnson (8) Centre (11) Miller
Haslack Guard (2) Palmer
Flynn McFarlane
Flood Coatts
Referee—Crummy

Here and There

There is no more of summer grumpy cities in Great Britain for a generation and perhaps longer. It is the view of Victor Sack, new editor of the Evening News, London, who spent a short vacation in Canada recently. He thought the miners' strike in Great Britain would not be settled before the fall and perhaps not until the winter.

The fishing season opens again August 13 on Lesser Slave Lake and Lake La Biche in Alberta. There are approximately 100,000 pounds of white fish to be shipped during the season from Lake La Biche and over half a million pounds from Lesser Slave Lake as well as a considerable quantity of jackfish and pickerel from both.

Canada's estimated wheat yield as indicated by crop conditions on June 30 is 348,626,000 bushels. The yield estimated for the Province of Saskatchewan is 227,230,000 bushels and for the rest of the Dominion 21,000,000 bushels. Total estimated yield for wheat is 458,810,000 bushels and for barley 100,924,000 bushels. For rye the total estimated yield is 11,762,000 bushels and for flaxseed 8,419,000 bushels.

The Manitoba Government has commenced an agricultural survey of unoccupied lands in the province which were completed well ahead of the incoming settlers, with all available information on such lands. A total of 2474 homesteads have been taken up in Western Canada this year. All post-war immigration records were broken recently when 1081 non-grants passed through Winnipeg recently in 48 hours.

The Earl of Clarendon, British Under-Secretary for Dominion Affairs, and T. Macnaughton, chairman of the overseas committee, are making a tour of Canada to investigate conditions under which the 3,000-family scheme is being handled in this country. They are leaving glowing reports of what they have seen. The full three thousand families will have been brought over here by the end of next year.

A civic vacation party arranged by the Kiwanis Club of St. Paul, Iowa, recently passed through Toronto and Montreal en route to London, England. There were 600 who availed themselves of the trip and most of them had never travelled outside the United States before in their lives. They will then reach Stratford-on-Avon and Oxford on their way to London and will make a side-trip to Paris and the French battlefields during their stay.

"Association football in the Dominion of Canada has been within the next few years to become a rival to the league of soccer played by the major leagues in Great Britain," was the comment of Joe Smith, captain of the All-England Association Football team which has just completed its seven-week tour of Canada. The team travelled close on ten thousand miles on its tour and played twenty games against all kinds of teams. They did not lose a single game and scored 105 goals in all with 1718 registered against them.

The GREATEST McLAUGHLIN-BUICK EVER BUILT

An Engine Vibrationless Beyond Belief

The McLaughlin Motor Car Company, Limited, today presents the 1927 McLaughlin-Buick, with an engine vibrationless beyond belief. This achievement, we earnestly believe, will rank as one of the most important in all motor car history. Our engineers, working in conjunction with the engineering staffs of General Motors Research Laboratories and General Motors Proving Ground have discovered the annihilation of vibration to a point never before attained. They have given McLaughlin-Buick motor cars a new luxury of quietness at every speed, exceptional among all cars, no matter what their price.

Never in all the twenty-two years of McLaughlin-Buick success has there been offered such convincing proof of engineering and manufacturing leadership. McLaughlin-Buick offers you today a brilliant example of the quality of McLaughlin-Buick craftsmanship—Confident that acquaintance with its performance and value will fix in mind the conviction that money can buy nothing finer—

Certain that you will discover, in this great new car, further evidence of the deep meaning in the longstanding pledge: "When Better Automobiles are built, McLaughlin-Buick Will Build Them."

Four Vital Engine Improvements

To produce the silent power-flow in the 1927 McLaughlin-Buick, McLaughlin-Buick engineers have made four fundamental improvements in the structure of the famous McLaughlin-Buick Valve-in-Head engine, including a Counter-Poised Crankshaft and a Torion Balancer; new lightweight pistons; and then a Completely Cushioned Engine insulated and isolated by rubber mountings, fore and aft, from all metallic contact with the chassis.

Other Vital Improvements

Another revolutionary improvement in the 1927 McLaughlin-Buick is the vacuum-cleaned crankcase. Crankcase moisture, the vicious foe of engine efficiency, is now drawn out of the crankcase before it has an opportunity to do harm. The crankcase is cleaned and kept free of sludge by the McLaughlin-Buick Vacuum Ventilator, a new device, operated by the air flow passing over the pistons and without a single moving part. The oil in the crankcase in the 1927 McLaughlin-Buick need be changed only four times a year!

McLaughlin-Buick performance is now made more certain, more pleasant and more economical.

Control by thermostatic control in the cooling system. Water circulation is prevented and the best held in the engine, until the proper operating temperature is reached. Grease nuts to remove by McLaughlin-Buick's new giant-tooth transmission, which is quiet in all of its speeds. Further quietness has been obtained by a new muffler design. And in this remarkable new car McLaughlin-Buick introduces balanced wheels, another contribution to better driving.

The primary beauty of the new Fisher bodies is in thorough keeping with the unusual and remarkable performance standards now attained.

The Most Remarkable Fact of All-Value

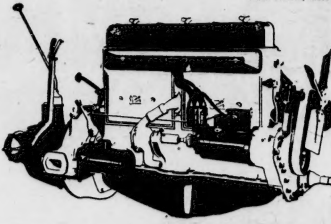

This Greatest of all McLaughlin-Buicks is the Greatest of all McLaughlin-Buicks values. McLaughlin-Buick volume has permitted engineering research and development on a scale far beyond the reach of most manufacturers.

Constant improvement has leveled one price barrier after another, until now you are offered, in this new McLaughlin-Buick, a car as fine as money can buy, at the price of cars of very ordinary quality. This car will convince you, as no other car can, that money can buy nothing finer—no matter how much you may be able to spend!

WHEN BETTER AUTOMOBILES ARE BUILT—McLAUGHLIN-BUICK WILL BUILD THEM

Sale Notice

In order to wind up the Phillip Lavergne Estate, bids will be received by the undersigned, up to the 16th day of August, 1926, for the following property:

All of Lots 19 and 20, in Block 4, Plan 1223 J, Stavelo, together with the Brick Garage and Barber Shop located thereon, and (subject to the reservations and conditions contained in the Original Grant from the Crown.)

Also: the following Garage equipment:

6 H.P. Fairbanks Engine and electric light plant complete; 2 oil tanks with pumps; Gasoline tank with pump; Tire rack; Water pump and tank; one Emery air compressor with tank; Yale lock and tackle and hoisting rack complete; Heating plant; Shafting; Spring rack; Desk; Showcase; Counter.

Marked cheque for 10 per cent of offer must accompany each bid, which will be returned if offer not accepted. The lowest or any bid not necessarily accepted. Balance of purchase price to be paid by September 15th, 1926, when possession to the premises will be given.

Address offers to: Executrix, Phillip Lavergne Estate, care of Bank of Commerce, Stavelo, Alberta.

ESTRAY

On the premises of W. A. Lyndon, Lyndon P.O., N.E. 1/4 of 27-12-29-w-4, one red and white steer, 3½ years, branded on left hip.

Saskatchewan exported last year 77.4 per cent of its total production of creamy butter, according to a statement made by the Provincial Dairy Commissioner. The increase in production in 1925 over that of 1920 had amounted to 198.5 per cent, the output last year totalling 13,949,283 pounds.

Close on one hundred pilgrims from St. Paul and Minneapolis passed through Montreal recently on their way to the famous shrine of St. Anne de Beausé, near Quebec. They were the advance guard of the great army of pilgrims that will visit the shrine every year. While stopping off in Montreal, they visited the St. Joseph Oratory in that city, also well-known as a shrine.

WORLD HAPPENINGS
BRIEFLY TOLD

The third biennial convention of the World's Federation of Education Societies will meet in Toronto, Aug. 4 to 10, 1927.

Premier Taschereau, of Quebec, delayed there will be no provincial elections this year. "The people of Canada have enough to consider and solve already," he comments.

Films of British cabinet members are to be sent to British seaside resorts, where the pictures of Premier Baldwin, Foreign Secretary Curzon, and others will be offered as programme features.

Professional mendicants, of Hamilton, who establish themselves in the downtown streets and seek alms by playing various instruments or selling small wares are to be ordered off the streets by the chief of police.

Hon. W. C. Omsby Gore, under-secretary of state for the dominions, states that he is not aware of any change being made in the arrangements for the imperial conference owing to the situation in Canada.

Arnold Munro, Ontario's only premier, has challenged General Dench to a duel. The challenge follows critical comments by the general, who is a well-known leader of the opposition to the Pacific Government, on an article written by the premier's brother.

Less than one per cent. of the cat tested in the tuberculosis free district, which is being established in Saskatchewan in the central district, have reacted to the test so far, and Hon. C. C. Hamilton, minister of agriculture for the province, is highly gratified at the splendid showing of the cattle in this territory.

The minimum demand for agricultural machinery in the United States next year is estimated at 126,132 million pre-war rubles, according to a statement in the forthcoming issue of the Commercial Importers' Bulletin.

Three large steamships operated by the United American Lines—the Republic, Rolland, and the Republic—have been sold to the Hamburg-American line in exchange for a financial interest in the German company.

Russians To Colonize Wrangell

Have Remitted This Barren Waste As Lenin Miffed

A Russian expedition is on its way to colonize Wrangell Island in the Arctic Ocean, North of Siberia, and to remove it to Lenin Miffed.

The expedition, in a Russian icebreaker, the Krassy Otkh (Red October) was scheduled to leave East Cape, Siberia, on the west side of the Bering Straits, June 25 for the island, or Miffed, respectively. In memory of Nicholas Lenin, considered the creator of Soviet Russia.

To Wrangell Island, for whose exploration and colonization less than 25 lives in three expeditions has been lost in 12 years, the Krassy Otkh was taking 20 families of Chukchees (Siberian Eskimos) and 100 dogs, and reindeer. Equipment of the colony includes 3,000 rubber coats for clothing and six large Eskimo sleds.

Provisions on the Red October for Lenin Miffed were calculated to last three years. Those familiar with the survey of Wrangell Island for Lenin Miffed pronounce it unhabitable. This because of cold, irresponsibility, absence of fuel and evidence scarcely of food.

Royalty Engages In Business

Russian Court Women Met With Success In Commerce

The manner in which ladies of the Russian court have thrown themselves into the life of commerce in Paris is a matter of much comment in the French press.

The Grand Duchess Marie went to work as an ordinary woman in a French embroidery house to learn her chosen profession. She has surrounded herself with a number of her companions in her own place. In another dressmaking establishment, Princess Marie of Romania, the empress and bookkeeper, Princess Troubetskaya is the general manager of the cutting room. Mile. Anouf has charge of the millinery.

New Settlers Satisfied In Alberta

More than 500 families have been located in Alberta in the last year under the 5,000-family scheme, according to W. S. Woods, of the land settlement board.

Mr. Woods states that the newcomers are doing splendidly and are well satisfied with the present conditions and their prospects.

The average man here is five and a half days a week from the time between the ages of twenty and thirty; twenty days between the ages of fifty and sixty.

W. N. C. 1628

French War Debt

British-France Agreement Is Wide In Scope

An agreement was signed recently for the funding of the French war debt to Great Britain at a conference between Winston Churchill, chancellor of the British exchequer, and Joseph Caillaux, French minister of finance, and a subsequent discussion with treasury officials to draft the terms of the agreement.

The settlement covers not only the French war debt, but virtually all the outstanding accounts between Great Britain and France. Announcement of this effect was made in the House of Commons by Mr. Hon. Winston Churchill, chancellor of the exchequer.

The French payments, he said, would be £4,000,000; £4,000,000; £8,000,000 and £16,000,000, rising to £12,000,000 annually, the last named figure being reached in 1930.

From 1920 to 1925, the payment would be £12,500,000 annually, rising to £14,000,000 for the final 21 years. Mr. Caillaux, expressed himself as deeply pleased with his reception in London and especially with Mr. Churchill's amicability.

The interest terms are £12,500,000 for 42 years and France will not be required to pay the deficiency of these five years of partial remission until after a long period, probably 25 or 30 years. The £5,000,000 of French gold now held in the Bank of England will be paid, will henceforth be regarded as part of the reserve of the Bank of France. There is also a safeguarding clause to prevent the French interests should be in default in her reparations payments.

France also is granted a transfer clause, whereby, in the event of her large payment to Britain endangering the stability of the franc, the annual payment will be postponed.

France also is granted a transfer clause, whereby, in the event of her large payment to Britain endangering the stability of the franc, the annual payment will be postponed.

Japanese Noblemen
Passes Through Canada

The Right Honourable Viscount

Kiyomasa Matsudaira, attaché to the Imperial Highness Prince Chichibu, second son of the Emperor of Japan, has just gone across Canada on his way to the United States, where he is to be photographed, by Trans-Canada Limited to Vancouver where he will sail for Yokohama for a few months vacation with his family. The Viscount was educated at Balliol College, Oxford, and stated that Prince Chichibu was also visiting Oxford this year.

His family relations were £12,500,000 for 42 years and France will not be required to pay the deficiency of these five years of partial remission until after a long period, probably 25 or 30 years. The £5,000,000 of French gold now held in the Bank of England will be paid, will henceforth be regarded as part of the reserve of the Bank of France. There is also a safeguarding clause to prevent the French interests should be in default in her reparations payments.

From 1920 to 1925, the payment would be £12,500,000 annually, rising to £14,000,000 for the final 21 years.

Mr. Caillaux, expressed himself as deeply pleased with his reception in London and especially with Mr. Churchill's amicability.

Search For Lost People

Missing Persons Bureau of New York
Police Department Handles

A stage magician, known as putting on the familiar "disappearing" act, would do well to comb his audience for the missing persons, as the bureau of the New York police department.

During the past year this bureau has had to deal with 25,000 missing persons, far more baffling than those from the magician's trick. The bureau has been successful in tracing 19,000 of the missing persons, but 6,000 such cases have been handled. And more than 99 per cent. of the vanished persons have been found.

When someone "drops out of the sight," as the saying is, it would seem to the experienced searcher that all the world must be dragged with a fine net. Some of the disappearances are unexpected, and apparently inexplicable that it seems to relatives and friends that the lost one must have stepped out of known life altogether.

There is no more strange mystery as Alice found on the other side of the looking glass.

Adults find it is interesting to learn from Lieutenant Ayres that of the 25,000 persons reported missing to the bureau last year only 6,000 were children or domestic trouble.

Professor Laird's Third Cross-Canada Tour

Professor Sinclair Laird, Dean of the School for Teachers, Macdonald College, makes his third annual tour "Across Canada and Back" with a party of Easterners leaving Toronto by Canadian Pacific Railway on July 12. Professor Laird's remarkable success with the two previous tours evoked such large demands for another of these "journey" trips to the land of majestic peaks and purple mists that the third tour becomes a necessity, a national requirement.

A personal acquaintance with Canada's provinces is considered essential for every Canadian's education nowadays. Travel is a sound investment which not only maintains its value throughout life but adds continually to daily pleasure and efficiency. Nothing can take the place of the personal experience that comes through travel, leading educationalists the world over agree. In the realm of Canadian literature, history and geography, reading and teaching may be enhanced and brightened by personal familiarity after the subjects have been seen and admired.

Long after the trip has been completed there will remain in the hearts of those who have made the journey the imprint of quiet valleys, wooded forests, and nature's dignified solitude. As Edith Johnson sang of the Rocky Mountains:

Farther than vision ranges,
Farther than eagle fly,
Stretches the land of beauty,
Arches the perfect sky,
Remoted through the purple mists afar.

The trip to the West covers the Muskoka district, and the world-famous mining region of Sudbury, Lake Superior is there skirting as far as Fort William, and thence to Winnipeg with a side trip to Winnipeg Beach, the Manitoban summer resort, and on to Indian Head, Regina, Moose Jaw and Calgary where the Canadian Pacific Rockies are entered through the Gap, two almost vertical walls of dizzy height, straggled and

appeared with snow and ice. Here we come to Banff headquarters of the Rocky Mountains Park, a wonderful region of 2,751 square miles embracing rivers, lakes, and noble mountain ranges.

From Banff to Jasper, more, 104 miles, the party under Professor Laird will go by automobile. Then from Windermere to Kootenay, through beautiful Kootenay Lake to Nelson. Leaving Nelson they pass through the Dukhovich country to Penton, skirting Okanagan Lake, then Fraser River at Hope and proceed to Vancouver. After two days of travelling back to the East the trip takes in the Fraser and Thompson River Canyons, and in especial the marvellous Lake Louise district. At the latter may be seen the white smoke of avalanches that go thundering down from the glacier four miles away. Lake Louise is about a mile and a quarter long and nearly half a mile wide. The Indians say the waters are distilled from peak-to-peak and paved with mother-of-pearl, and in them pour those wild blue waters whose colors are limited to the palette of the glaciers.

On the journey back East the trip is varied by calls at Edmonton and Saskatoon, while the awe-inspiring Devil's Gap near Kenora is also taken in. A full day is spent at each of these places. From Fort William the party embarks on a Canadian Pacific steamboat on which they traverse Lakes Superior and Huron to Port McNoll whence a short trip to Toronto ends the journey.

While the trip is under the leadership of Professor Sinclair Laird it is by no means confined to travellers who belong to the teaching profession, and in former years a large proportion has been composed of people drawn from industrial business and municipal circles who desire to increase in this pleasant and unique manner their acquaintance with the facts of their own country.

SCHUMACHER BROS. Lumber Manufacturers

CLARESHOLM, ALTA.

Please put in your order; we have a price to meet all needs.

Will take cattle, sheep or hogs in exchange for lumber.

A FINE BATHROOM

Modern fixtures have another advantage—they are easier to keep clean than the old-fashioned kind. Those beautiful smooth white surfaces can be kept in a glossy condition with very little care—and there are no difficult corners where only an acrobatic contortionist could successfully drop in and see our display of bathroom fixtures.
